

Vision Statement- Easy Attendance

Overview

A digital attendance clock provides first and foremost a daily and consistent report about the presence of employees in the organization. Attendance reports allow both the employee and the employer to know that there is a neutral device that counts the working hours from the moment the employee arrives at the organization until he leaves without the working hours being edited and changed.

This clock can be seen in any frame that contains within it a wide number of tens to hundreds of workers.

Most of those attendance clocks programs are not accessible by mobile application, and they are missing various of features that makes the daily reporting more complicated than it should.

Covid19 time has changed reality and many people started working from home. The new reality made us deal with new adjustments and suddenly all attendance reports which was only able to be filled from work are no longer useful. The Covid19 just emphasized the disadvantages of the attendance programs.

Our product came for one major goal- makes life easier in the aspect of attendance reports, for working people all over the world who wants to be able to fill their working hours anywhere in anytime, in just one click.
